1. What is CSS clearfix, how is it used, and why is it helpful?
    a. It is a function you can use where it will then cause images or elements that are too large for container, this will cause the container to extend and encapsulate the image/element that is too big.
    b. https://www.w3schools.com/css/tryit.asp?filename=trycss_layout_clearfix

2. What are SaSS and LESS?
    a. SASS is the acronym for: Syntactically Awesome Style Sheet
    b. LESS is the acronym for: Leaner Style Sheet
    c. These are both CSS pre-processors
        i. They allow you to define a set of css styles as a variable that can be then called by another css class.
            1. Will allow you to make your css easier to read and lower repeatable code.
    d. https://www.geeksforgeeks.org/what-are-the-differences-between-less-and-sass/

3. What is a highlight of what you have learned this week?
    a. I really enjoyed learning the css because it really is helping me make things look good and not old school and terrible.
